# Welcome and Introductions

The background of the slide is a photograph of a wide, calm body of water, likely a lake or a wide river, under a soft, golden sky. The sun is low on the horizon, creating a warm, orange glow that reflects on the water's surface. In the distance, dark, silhouetted mountains rise against the horizon. The water in the foreground shows gentle ripples, suggesting a recent disturbance, possibly a small boat or a person's hand touching the water. The overall mood is peaceful and scenic.

**Sophie  
Tremblay Morissette**

Manager of Arts, Tourism and  
Culture, Yukon Government

# Challenges

# Meaning Making: What is “Strategic”

# What is strategy?

- **There are all kinds of synonyms for strategy; they depend on the organization and its culture.**
  - Purpose
  - Mission
  - Vision
  - Goals
  - Objectives
  - Tactics
- **A strategy is simply put a choice of a course of action**

**Strategy**

**Tactics**

**Initiative**

**Project**

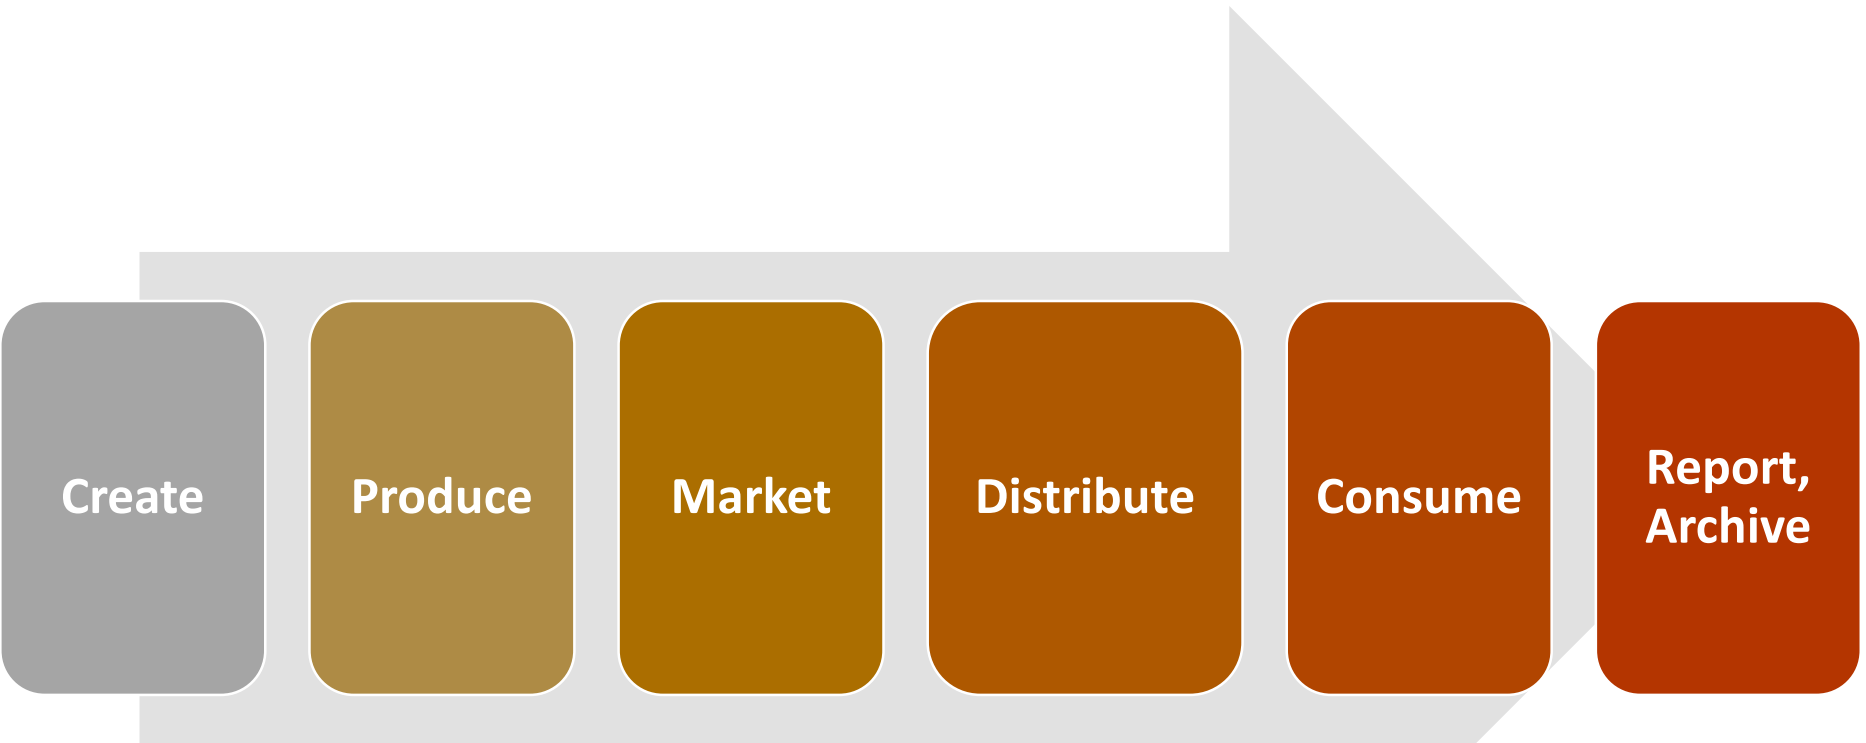

**Digital technologies  
project**

**Digital arts project**

**Strategic development = Long term impact  
beyond your own organization and its  
audiences, stakeholders**

# Strategic transformation= lasting change

**Digital Technologies tend to disrupt 'bricks-and-mortar' industrial production / creative chains in unanticipated ways**

- **Strategic Planning = A dynamic process that deals with fundamental, far-reaching, long-term decisions**
- **Strategic Plan = Our roadmap; living document**
- **Strategic Management = Systemic implementation of strategy across an organization or organism; measure and adjust**

# What is Digital

Digital vs analog

Electronic signals vs waves

# Digital Technology

**Online /  
Internet**

**Stand  
alone  
computer  
/ devices**

**Virtual  
Reality  
systems**

## ▲ Current Digital Technologies

This list of digital technologies has been collected from various reports<sup>678</sup> and web searches. This list is a snap shot that aims to capture major categories, rather than specific technologies, of digital used in or with potential in the performing arts.

### Digital technologies in performance settings

- Digital images, animation and video in stage production design
- Digital supers, closed captioning in theatre, opera
- Digital sound mixers and other production technologies
- Movement, gesture and video sensors
- Artificial figures and virtual characters, holograms of live performers

### Digital technologies in off-line environments

- Cinematic events (e.g. Metropolitan Opera, Stratford Festival live HD broadcasts)
- Installations, sound and image sculptures
- Augmented reality
- Virtual Reality (There is convergence toward online integration)
- Video games (consoles) (Most have strong online integration)
- 3-D animation (in movies; games)

### Digital on Virtual Private Networks

- Distance arts education in HD for point-to-point events

### Digital technologies online

- Websites, HTML5, Semantic web
- Webcasting and live streaming
- Music streaming services
- Video on demand services
- Music and movie file downloads
- Mobile apps
- Mashups (application hybrids)

### Digital peer-to-peer online platforms

- Facebook live video
- Youtube video
- Social video streaming (Periscope)
- Snapchat

### Online communications

- Social media platforms
- Email, E-Newsletters
- Blog, website
- Search engines
- Crowdfunding
- Online games
- Intelligent personal assistant (e.g. Siri, Alexa)

# Digital Mindset

Scale up and beyond

# What is our tech future?

**“Television won't be able to hold on to any market it captures after the first six months. People will soon get tired of staring at a plywood box every night.”**

*Darryl Zanuck, executive at 20th Century Fox, 1946*

# There is no predicting the tech future

**“There is no reason anyone would want a computer in their home.”** *Ken Olsen, founder of Digital Equipment Corporation, 1977*

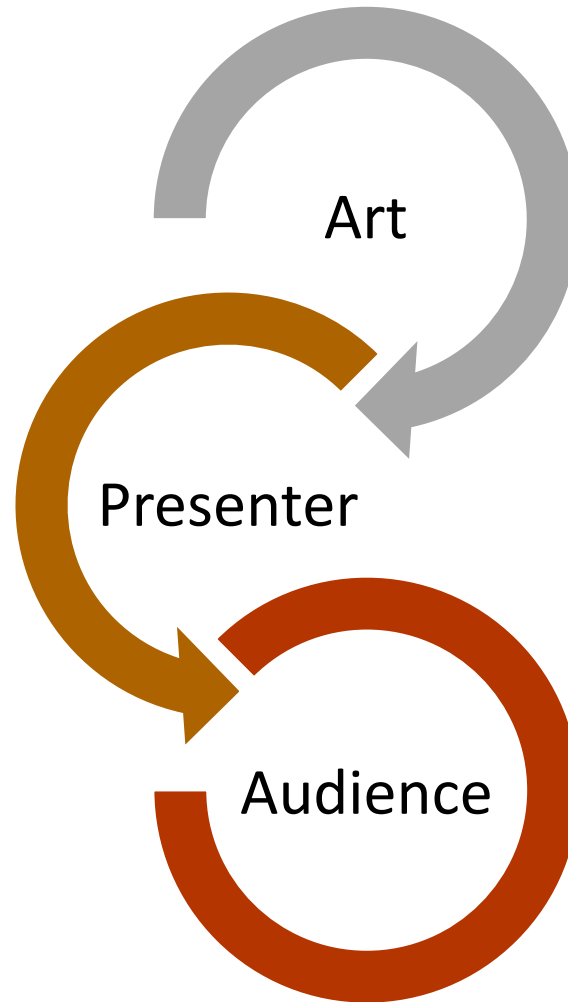

# Why we **won't 'predict'** the tech future

- “Almost all of the many predictions now being made about 1996 hinge on the Internet’s continuing exponential growth. But I predict the Internet will soon go spectacularly supernova and in 1996 catastrophically collapse.” *Robert Metcalfe, founder of 3Com, 1995*
  - *In 1999, he literally ate his words as he had promised in that article.*

# Our work is simple

# Our context is changing: Analog vs Digital

What we know to do

What we need to get comfortable with

When LIVE was only way to experience performing arts

Radio, TV, Internet, AR, VR, virtual characters, holographic projection

Image: Hatsune Miku, Crypton Future Media, virtual character, software voice synthesizer

# Digital Mindset: A Future Scenario

<https://youtu.be/zKv6uGPwE9o?t=2m32s>

[https://creators.vice.com/en\\_uk/article/yp5ddx/control-this-holographic-android-via-twitter](https://creators.vice.com/en_uk/article/yp5ddx/control-this-holographic-android-via-twitter)

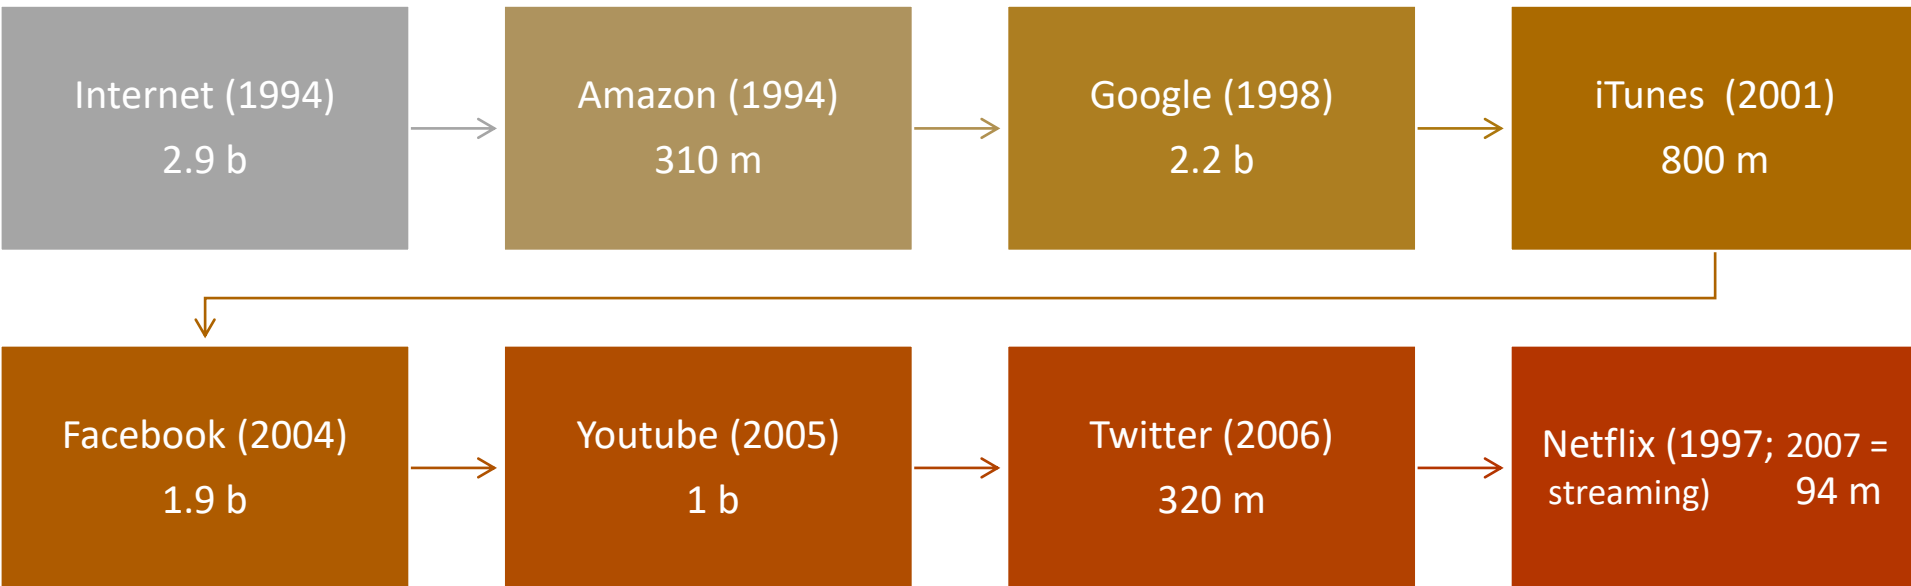

Creative agency work to promote U.K. TV show *Almost Human*  
Holography and social media interactivity

# Digital Mindset = Design Thinking

- Iterative development
- More unknowns than knowns
- Feels risky
- High reward
- Driven by vision and user-centric to the extreme

# Digital Mindset = Digital Scale = New Value

**Who owns Kindle?**  
**Amazon!**

**(Not printers or publishers)**

**Who owns iTunes?**  
**Apple!**

**(Not Music Labels)**

# Digital Innovation = New Value

Platforms	Infrastructure	Revenue Streams
<ul style="list-style-type: none"><li>• Google</li><li>• Facebook</li><li>• Amazon</li><li>• iTunes</li></ul>	<ul style="list-style-type: none"><li>• Hardware</li><li>• Software</li><li>• Server farms</li><li>• Technology staff</li><li>• Interface/UxD</li><li>• Data architectures<ul style="list-style-type: none"><li>• Semantic web</li></ul></li></ul>	<ul style="list-style-type: none"><li>• End users pay</li><li>• Content providers pay for placement</li><li>• Offer Free and Premium services</li><li>• Advertising (need very large user base)</li><li>• B2B Marketing Partnerships</li><li>• New uses of platform</li></ul>

Digital disrupts every bricks and mortar business chain

# Semantic Web

Open, Linked Data

# Data about data = meta data

- Semantic = Meaning of a word, phrase, text
- Semantic web = machine-readable data
- Meta data standards (e.g schema.org)
- Supporting standards like ISNI (International Standard Name Identifier, ISO-certified)  
<http://www.isni.org/>
- Meta data tags

# Are you on the web or in it?

## ON the web

- Web site
- Drive traffic to site
- Social media
- Closed system
- Traditional SEO

## IN the web

- Database
- Common metadata standard
- Open, linked data
- Discoverability

# Moving from finding links and websites via Search engines, to getting the answers you want

**Stagecraft** is the technical aspect of theatrical, film, and video production. It includes constructing and rigging scenery; hanging and focusing of lighting; design and procurement of costumes; make-up; **stage** management; audio engineering; and procurement of props.

## Whitehorse

City in Canada

Whitehorse is the capital of northwest Canada's Yukon territory. To the south are the basalt cliffs of Miles Canyon, site of a former gold rush town. From the canyon, the Yukon River Loop Trail winds north past the Whitehorse Fishway fish ladder toward the S.S. Klondike, a restored sternwheeler that once plied the Yukon River. North, the Takhini Hot Pools' mineral springs offer views of the northern lights in winter.

**Weather:** -20°C, Wind S at 34 km/h, 76% Humidity

**Population:** 25,085 (2016)

### Famous Musicians - Most Popular Musicians of the World

<https://www.thefamouspeople.com/musicians.php> ▼

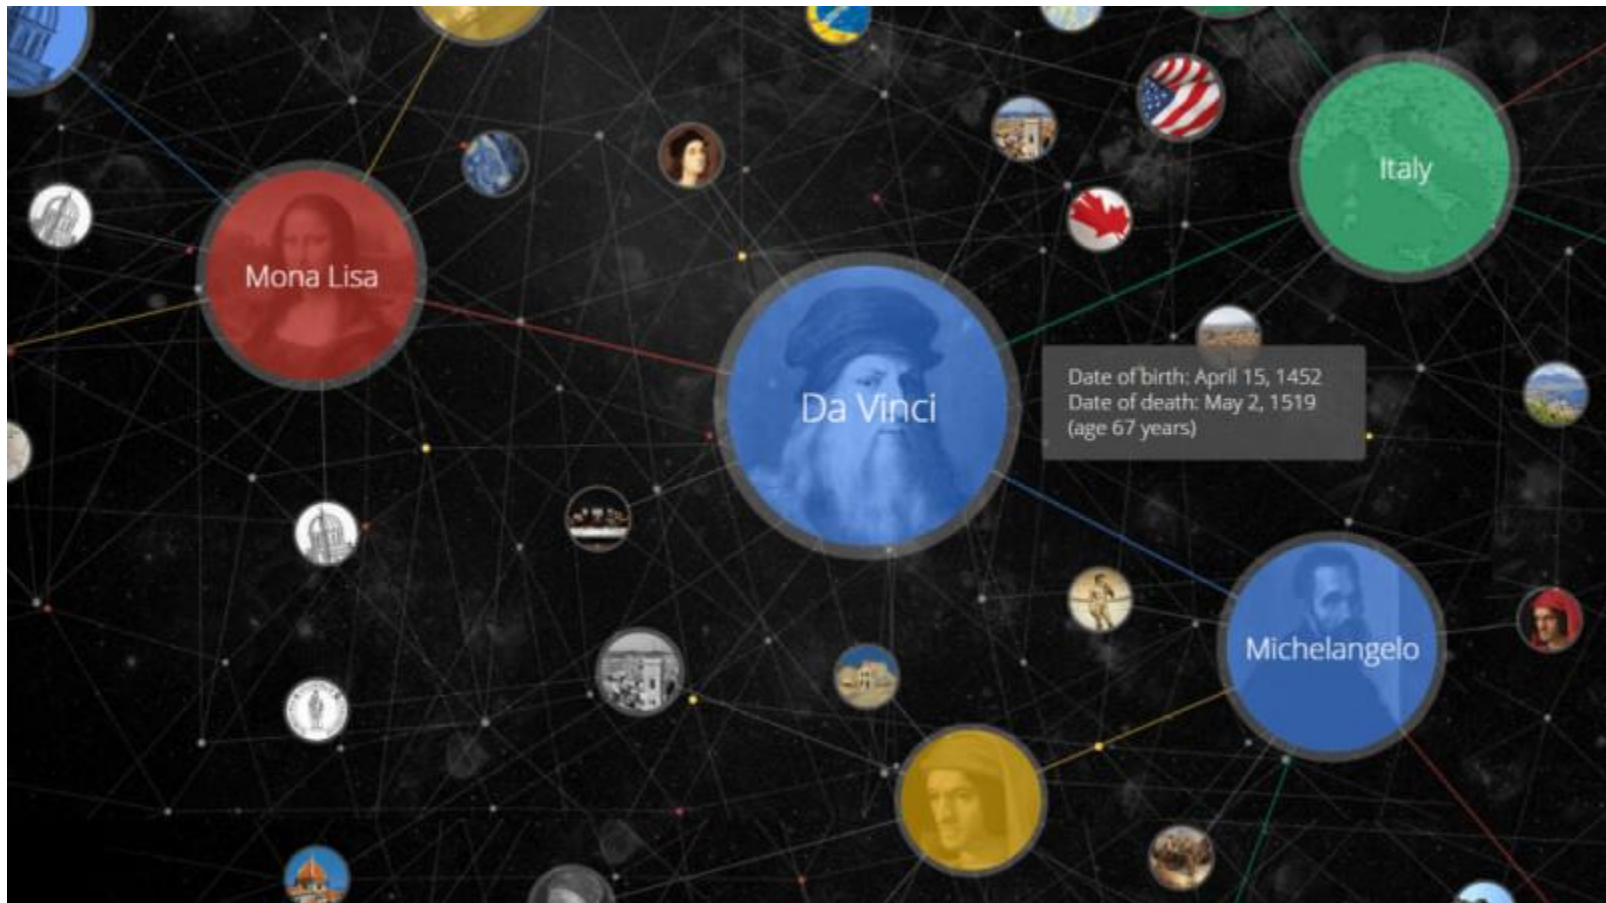

Musicians. A musician is a person who plays one or many musical instrument and is also referred to as an instrumentalist. History has given us some really notable music composers and performers the likes of which include names of people like Wolfgang Amadeus Mozart, Johann Sebastian Bach and Ludwig Van Beethoven.

[Famous Musicians](#) · [Saxad Players](#) · [Guitarists](#) · [Pianists](#)

# Network = connectivity: Open, linked data

## Google knowledge graph

<https://www.google.com/intl/es419/insidesearch/features/search/knowledge.html>

# UxD

The human matters

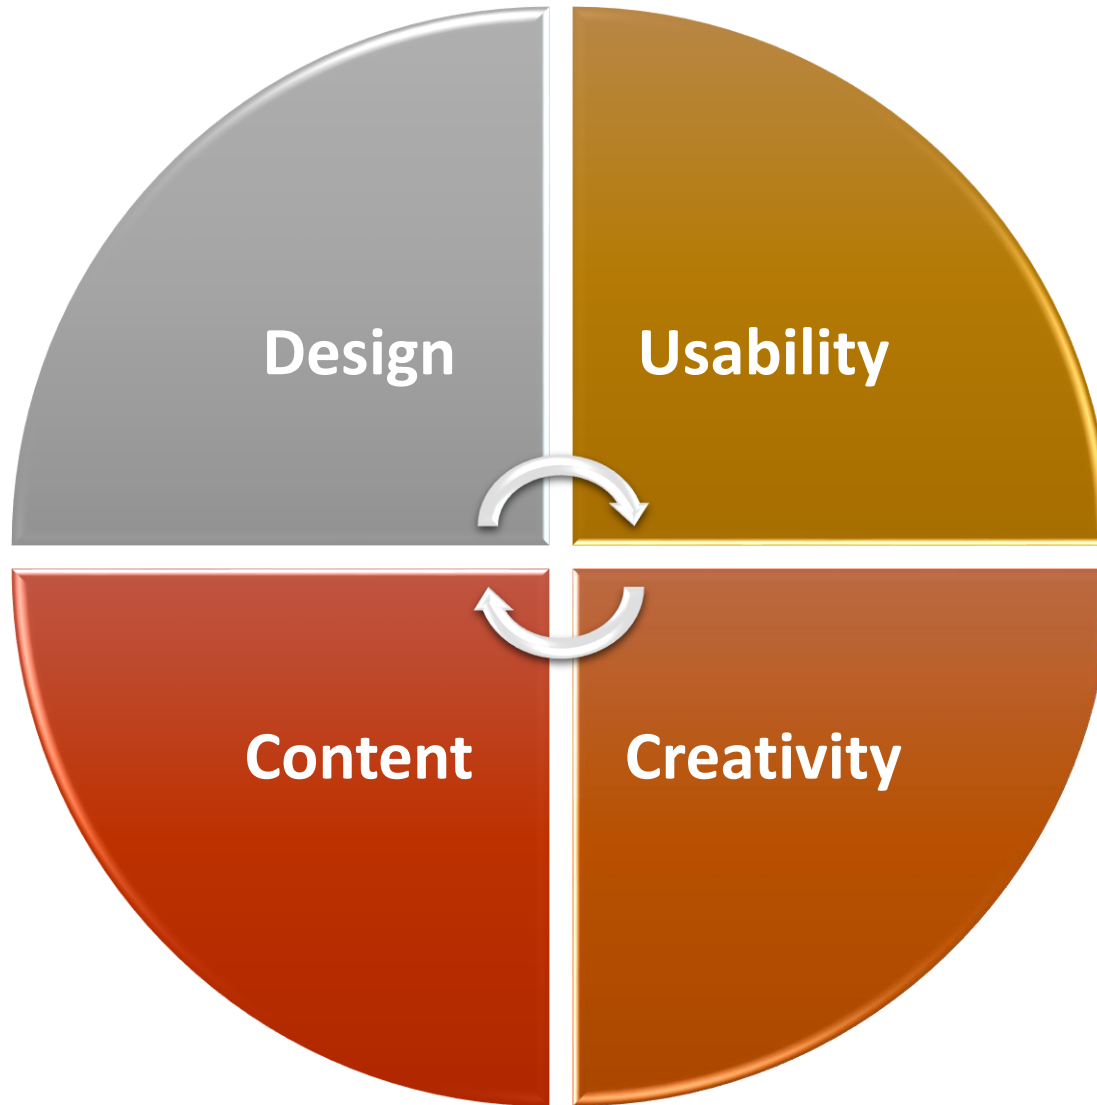

# User Interface Design

## User Experience Design

# Rule # 1

## Always start with your audience

- **Who is your audience?**

- What do they want from you?
- When do they want it?
- How/where do they want it?

- **What do you want them to do?**

# Effective communication

# New thinking about whole online channel eco-system re: UxD

**Connected  
devices**

**Connected  
screens**

# Usability testing = qualitative research

- **Iterate in design and production stages**
  - Identify user groups
  - 4 to 6 people per distinct user group
- **Consider task-based scenarios**
  - Can they complete them with ease and certainty
  - What are difficulties they encounter
- **Testing with people**
  - On functionality – “if you could do this, would you?”
  - On wire frames
  - Usability of prototype
- **Testing technology**
  - Load times
  - Coding

# Process vs Project Funding Proposal

## Project

1. Specific outcome
2. Annual programming
3. Artistic practice
4. Single entity
5. Budget certainty
6. Known universe

## Process

1. Specific intention
2. Define problem clearly
3. Method and approach: Iterative development process
4. Collaborations and skills
5. Budget still certain, but outcomes are fluid
6. How to manage uncertainty and risk

# Process orientation = different emphasis

How can we navigate uncertain circumstances with few known or accepted sign posts?

How do we solve problems or manage dilemmas when the need for change is overwhelming?

How can we be sure that the issue we have identified is indeed the right issue?

# Process proposal focal points

- Issue definition, redefinition
- Learning through research
- Managing insight and action
- Methods of reflection and iteration
- Living documentation
- Operational plan that harnesses who does what when and how and has accountability mechanisms, “go/no-go” decision
- Collaborative partnerships with different skill sets
